# QUALICA-RD QRD2000 CLOUDMATPRES

## Main Features

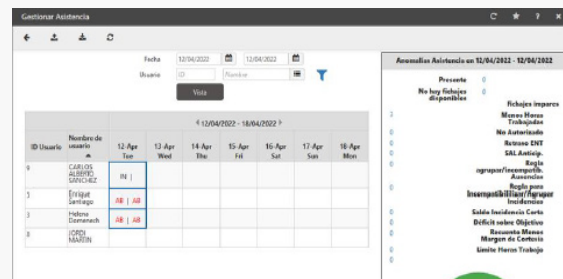

### Shift Clerk

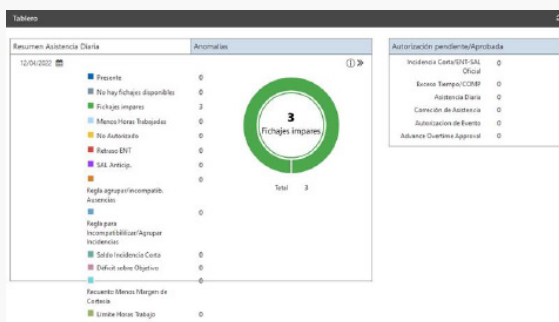

Automatic shift correction: when working with multiple shifts, many times changes are made and employees take a different shift than usual. The application corrects the shift based on the markings.

### Calendar

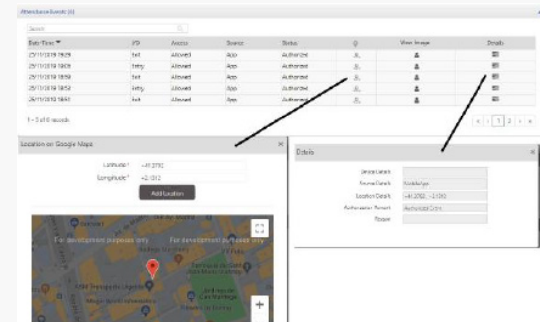

Holidays and long weekends: 30 different holiday calendars with 32 holidays each can be created. Some holidays with start and end dates to extend periods. You can also create long weekends.

### Workday

Manual entries and corrections of I/O events to correct factors that are not defined in the presence and occurrence policies.

### Signups and Notifications

The administrator can easily send alert messages to a group. Subsequent adjustments: HR can correct data after the fact and apply new policies.
