Solutions

QUALICA-RD **TIME & CLOUD**

The smart cloud-based T&A solution

- **CLOUD-BASED SOFTWARE**
- **EMPLOYEE WEB PORTAL**
- **SMARTPHONE CLOCKING**

QUALICA-RD **TIME & CLOUD** is a cloud-based employee time tracking software.

The **Employee Web Portal** allows staff to request holidays, to justify absences and to edit punches. This solution also allows the **Smartphone clocking in**.

Access your data from anywhere you have Internet access. **No need to install an app.**

QUALICA-RD TIME & CLOUD

Time & Attendance
and
Access Control

Cloud-based T&A solution

QUALICA-RD TIME & CLOUD is an advanced Time & Attendance solution with NEW features, making its management easier and offering a wide range of records.

Cloud-based

- Access all data from any computer.
- High security level. Data stored in an off-site data center.
- Automatic updates.
- No need to create a backup copy.

CLOUD-BASED

Employee WEB Portal

- All data are immediately available for **employess** to see. This online tool allows staff to **request and accept** changes related to personal data and configuration.
- **It gives the employee the opportunity to request holidays**, justify an absence or modify any punches.
- Staff can check the status of existing request (pending, successful or rejected).
- List printing.
- **Smartphone clocking punch.**

SMARTPHONE CLOCKING PUNCH

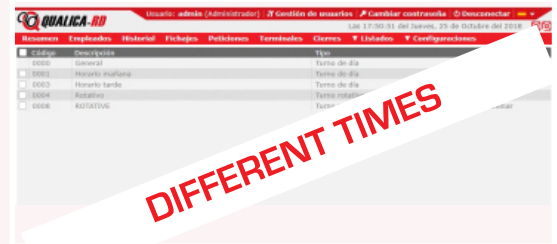

Time & Attendance
and
Access Control

QUALICA-RD TIME & CLOUD

Cloud-based T&A solution

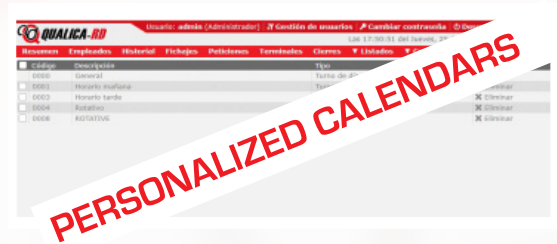

Schedules

- Daytime, nighttime, rotating and flexible schedules can be established.
- Controls costs according to the different schedules performed.
- Attendance control, incidents, provide support for schedules, change schedules for specific days or mark pre-established schedules.

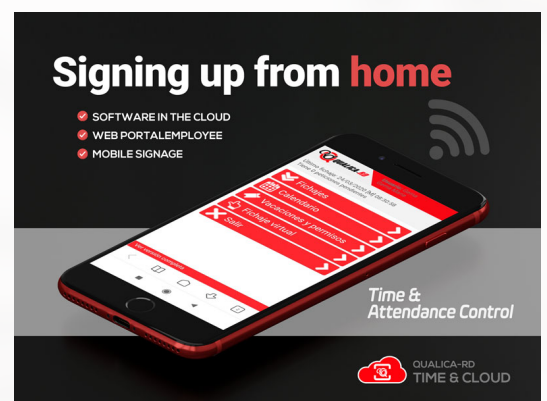

Calendars

- Public calendars can be defined and customized for each employee. Supports days with time variants or incidents (vacations, leaves, trips, etc.)
- Improved calendar management incorporating annual and comparative view.

Signings

- Supports clocking rounding, automatic presence interruptions and departures with automatic incidence.
- It performs the automatic pairing of punches, avoiding having to perform the pairing and closing of punches manually.
- **Allows signings from mobile devices.**

Listings

- Simplifies the reporting system, making it faster and allowing more customization. More columns can be added to the reports and custom calculations can be made using formulas.

Time & Attendance
and
Access Control

QUALICA-RD
TIME & CLOUD

Cloud-based T&A solution

Incidents

- Controls entry, exit and mixed incidents and can choose whether or not they should be counted as time worked and extend them to subsequent days.

Purse

- Purse balance control, which makes it easy to list employees who exceed the time or times allowed for an occurrence (e.g. going out to smoke).

Others

- Supports setting siren tones.

Idiomas

- Multi-language platform, including English, Spanish and Portuguese.

New Improvements

- Sanitary Plugin (temperature recording)
- Facial and palm biometrics control with qrd1000iface terminals
- New request privileges
- QR code associated to the user
- List of times and costs
- New language
- Calendar copy
- Calendar import and export
- Usability improvements
- App for clocking from mobile devices, both IOS and Android.
- Anti-covid19 module with temperature detection and mask.
